2019 Symposium on Aging Research: Translating Discovery to Therapy Medical College of Georgia, Augusta University February 26, 2019, BC1400 (small auditorium)

9:00-9:20	Welcome & Introduction to the Center for Healthy Aging
	Session 1: Advances in bone biology & nutrition
9:20-9:40	Harry Blair - "New insights on bone replacement mechanisms: Implication for the aging skeleton" University of Pittsburgh Medical Center
9:40-10:00	Gustavo Duque - "Osteosarcopenia: Where bone, muscle and fat collide" University of Melbourne, Australia
10:00-10:20	Serge Ferrari - "Molecular regulation of bone modelling by remodelling mechanism" Geneva University Hospital, Switzerland
10:20-10:40	BREAK
10:40-11:00	Karl Insogna - "Dietary Calcium: Bad to the Bone?" Yale University School of Medicine
11:00-11:20	Mary Ann Johnson - "Georgia Centenarian Study – Nutrition" University of Nebraska
11:20-11:40	lan Reid - "Preventing Fractures in Women Who Don't Have Osteoporosis" University of Auckland, New Zealand
	Session 2: Working lunch-Graduate Student Research in Musculoskeletal Aging
12:00-12:20 12:20-12:40	Mackenzie Hagan (McGee-Lawrence Lab) "Aging enhances osteocyte plasma membrane repair" Helen Kaiser (Hamrick Lab) "Inhibition of kynurenine production protects skeletal muscle from the related loss of mass and strength"
12:40-1:00	
	Jessica Pierce (McGee-Lawrence Lab)" Glucocorticoid signaling plays a critical role in osteoprogenito function and the response of bone to metabolic stress"
1:00-1:20	function and the response of bone to metabolic stress" Session 3: Research on brain aging, dementia, and neurodegeneration David Hess - "Vascular Dementia and Brain Aging" Augusta University
	function and the response of bone to metabolic stress" Session 3: Research on brain aging, dementia, and neurodegeneration David Hess - "Vascular Dementia and Brain Aging" Augusta University Allan Levey - "Racing to 2025 to Develop New Treatments for Alzheimer's Disease"
1:20-1:40	function and the response of bone to metabolic stress" Session 3: Research on brain aging, dementia, and neurodegeneration David Hess - "Vascular Dementia and Brain Aging" Augusta University Allan Levey - "Racing to 2025 to Develop New Treatments for Alzheimer's Disease" Emory University School of Medicine Audrey Duarte - "The Multifaceted Nature of Age-Related Episodic Memory Impairments" - Georg
1:20-1:40	Function and the response of bone to metabolic stress" Session 3: Research on brain aging, dementia, and neurodegeneration David Hess - "Vascular Dementia and Brain Aging" Augusta University Allan Levey - "Racing to 2025 to Develop New Treatments for Alzheimer's Disease" Emory University School of Medicine Audrey Duarte - "The Multifaceted Nature of Age-Related Episodic Memory Impairments"- Georg Institute of Technology Alvin Terry - "Developing Therapeutic Strategies to Target Age-Related Cognitive Impairments Us
1:20-1:40 1:40-2:00 2:00-2:20	function and the response of bone to metabolic stress" Session 3: Research on brain aging, dementia, and neurodegeneration David Hess - "Vascular Dementia and Brain Aging" Augusta University Allan Levey - "Racing to 2025 to Develop New Treatments for Alzheimer's Disease" Emory University School of Medicine Audrey Duarte - "The Multifaceted Nature of Age-Related Episodic Memory Impairments" - Georg Institute of Technology
1:00-1:20 1:20-1:40 1:40-2:00 2:00-2:20 2:20-2:40	Session 3: Research on brain aging, dementia, and neurodegeneration David Hess - "Vascular Dementia and Brain Aging" Augusta University Allan Levey - "Racing to 2025 to Develop New Treatments for Alzheimer's Disease" Emory University School of Medicine Audrey Duarte - "The Multifaceted Nature of Age-Related Episodic Memory Impairments" - Georg Institute of Technology Alvin Terry - "Developing Therapeutic Strategies to Target Age-Related Cognitive Impairments Us Rodent and Non-Human Primate Models" Augusta University
1:20-1:40 1:40-2:00 2:00-2:20	Session 3: Research on brain aging, dementia, and neurodegeneration David Hess - "Vascular Dementia and Brain Aging" Augusta University Allan Levey - "Racing to 2025 to Develop New Treatments for Alzheimer's Disease" Emory University School of Medicine Audrey Duarte - "The Multifaceted Nature of Age-Related Episodic Memory Impairments" - Georg Institute of Technology Alvin Terry - "Developing Therapeutic Strategies to Target Age-Related Cognitive Impairments Us Rodent and Non-Human Primate Models" Augusta University Break
1:20-1:40 1:40-2:00 2:00-2:20 2:20-2:40	Session 3: Research on brain aging, dementia, and neurodegeneration David Hess - "Vascular Dementia and Brain Aging" Augusta University Allan Levey - "Racing to 2025 to Develop New Treatments for Alzheimer's Disease" Emory University School of Medicine Audrey Duarte - "The Multifaceted Nature of Age-Related Episodic Memory Impairments" - Georg Institute of Technology Alvin Terry - "Developing Therapeutic Strategies to Target Age-Related Cognitive Impairments Us Rodent and Non-Human Primate Models" Augusta University Break Session 4: Collaborative research & funding opportunities
1:20-1:40 1:40-2:00 2:00-2:20 2:20-2:40	Session 3: Research on brain aging, dementia, and neurodegeneration David Hess - "Vascular Dementia and Brain Aging" Augusta University Allan Levey - "Racing to 2025 to Develop New Treatments for Alzheimer's Disease" Emory University School of Medicine Audrey Duarte - "The Multifaceted Nature of Age-Related Episodic Memory Impairments" - Georg Institute of Technology Alvin Terry - "Developing Therapeutic Strategies to Target Age-Related Cognitive Impairments Us Rodent and Non-Human Primate Models" Augusta University Break Session 4: Collaborative research & funding opportunities Mark Hamrick - "Center for Healthy Aging: Mission & Vision" Augusta University
