- Permanently prohibited from engaging in ANY commercial fishing activities.

Ryan A. Bailey – Tidal Fish License # 16421 Revoked

- Effective: 8/31/18
- Permanently prohibited from engaging in ANY commercial fishing activities.

Richard M. Barnes, Jr. –

Tidal Fish License # 88521 Revoked

- Effective: 10/1/18
- Permanently prohibited from engaging in ANY commercial fishing activities.

Oyster Authorization/ Entitlement Revoked under TFL # 88521 Revoked

- Effective: 6/18/18
- Permanently prohibited from engaging in the commercial harvest of wild oysters in Maryland.

Jerry L. Bloodsworth, Sr. – Oyster Authorization/ Entitlement Revoked under TFL # 7831 Revoked

- Effective: 2/13/18
- Permanently prohibited from engaging in the commercial harvest of wild oysters in Maryland.

Matthew J. Booze – Oyster Authorization/ Entitlement Revoked

- Effective: 5/3/17
- Permanently prohibited from engaging in the commercial harvest of wild oysters in Maryland.

Harvey T. Bowers – Oyster Authorization/ Entitlement under TFL # 77003 Revoked

- Effective: 5/22/18
- Permanently prohibited from engaging in the commercial harvest of wild oysters in Maryland.

Alan D. Bozman – Oyster Authorization/ Entitlement under TFL # 7820 Revoked

- Effective: 4/7/17
- Permanently prohibited from engaging in the commercial harvest of wild oysters in Maryland.

Benjamin S. Byers – Oyster Authorization/ Entitlement Revoked

- Effective: 10/24/12
- Permanently prohibited from engaging in the commercial harvest of wild oysters in Maryland.
- May not possess an Unlimited TFL during ANY oyster season (October 1st - March 31st).

Vaughn E. Collins, Jr. – Oyster Authorization/ Entitlement Revoked under TFL # 15290 Revoked

- Effective: 4/23/18
- Permanently prohibited from engaging in the commercial harvest of wild oysters in Maryland.

Jeffrey S. Cummings, Sr. – Tidal Fish License # 825 Revoked

- Effective: 1/30/15
- Permanently prohibited from engaging in ANY commercial fishing activities.

James A. Faulkner, Jr. – Oyster Authorization/Entitlement under TFL # 2502 Revoked

- Effective: 6/13/13
- Permanently prohibited from engaging in the commercial harvest of wild oysters in Maryland.

Walter W. Fields – Oyster Authorization/ Entitlement Revoked

- Effective: 4/7/17
- Permanently prohibited from engaging in the commercial harvest of wild oysters in Maryland.

Richard N. Fluharty – Oyster Authorization/Entitlement under TFL # 1061 Revoked

- Effective: 3/23/11
- Permanently prohibited from engaging in the commercial harvest of wild oysters in Maryland.

John L.W. Griffith – Oyster Authorization/Entitlement under TFL # 2756 Revoked

- Effective: 3/13/18
- Permanently prohibited from engaging in the commercial harvest of wild oysters in Maryland.

Edward E. Grimes, Jr. – Oyster Authorization/Entitlement under TFL # 16426 Revoked

- Effective: 6/5/12
- Permanently prohibited from engaging in the commercial harvest of wild oysters in Maryland.

Daniel F. Haddaway – Oyster Authorization/Entitlement under TFL # 60633 Revoked

- Effective: 6/27/17
- Permanently prohibited from engaging in the commercial harvest of wild oysters in Maryland.

George M. Hayden – Oyster Authorization/Entitlement under TFL # 21953 Revoked

- Effective: 10/4/19
- Permanently prohibited from engaging in the commercial harvest of wild oysters in Maryland.

Jody D. Jackson – Authorizations/Entitlements Revoked

- Effective: 9/8/18
- Permanently prohibited from engaging in ANY commercial fishing activities.

Joseph B. Janda, Jr. – Tidal Fish License # 5580 Revoked

- Effective: 5/8/13
- Permanently prohibited from engaging in ANY commercial fishing activities.

Vance J. Kazmaier – Authorizations/Entitlements Revoked

- Effective: 12/2/18
- Permanently prohibited from engaging in ANY commercial fishing activities.

Hans E. Kuntze, Sr. – Oyster Authorization/Entitlement under TFL # 65536 Revoked

- Effective: 8/29/16
- Permanently prohibited from engaging in the commercial harvest of wild oysters in Maryland.

Regulations that became Effective

View Regulatory Actions at <http://dnr.maryland.gov/fisheries/Pages/regulations/changes.aspx>

- Submerged Aquatic Vegetation — 08.02.01.12 — Effective 6/15/20
Updates SAV protection zones. Based on comments received, a few areas were changed slightly when the regulation was adopted. The same amount of SAV was protected.
- Striped Bass — 08.02.15.09, .10, .12 — Effective 7/16/20
Changes for the Chesapeake Bay and its tidal tributaries. Reduces the creel limit from 2 to 1/person/day; makes it clear that the minimum size is 19 inches; establishes a closure period of August 16, 2020 through August 31, 2020; requires that, while fishing, all striped bass in a person's possession shall meet the size and possession limits set forth in regulation for that area; changes the end of the season to December 10; removes the provision that allows the captain or the mate to keep a striped bass during a charter trip.
- Tautog — 08.02.05.20 — Effective 7/16/20
Commercial tagging requirements; recreational and commercial season and catch limits; clarifies gear requirement; and updates public notice requirements.
- Scup — 08.02.05.22 — Effective 7/16/20
Updates the trawl thresholds and removes the requirement to post public notices in a newspaper and replaces it with posting the notice on the website.

Fishing and Boating Services Regulatory Scoping July 2020

Please review the following possible regulatory changes. The department is looking for your advice on how to proceed with scoping (i.e. open houses, web feedback only, etc.). The department's normal process is to scope each topic on the department's website, through GovDelivery Communications, and on social media (Facebook and Twitter).

This format is consistent with the legislation that became effective July 1, 2019 that requires us to provide information that answers questions (who, what, where, when, why) to help stakeholders/small businesses understand and comply with a regulatory idea.

A google comment form will be created for each topic and be available for the comment period.

Topic Being Scoped	Page Number(s)
Atlantic Surfclam — Housekeeping	2
Bluefin Tuna, Billfish, Swordfish, and Shark — Recreational Reporting	3-4
Fishery Management Area — Cushwa Hatchery	5
Limited Fishing Guide (Type L) — Housekeeping	6
Shellfish (Oysters, Soft-Shell Clams, and Hard Clams) — NSSP Requirements	7-9
Striped Bass — Chesapeake Bay Commercial Transfer Cap	10-11
Striped Bass — Circle Hooks	12-13
Striped Bass — Commercial ITQ Hook & Line Season Extensions	14
Submerged Aquatic Vegetation — Housekeeping	15-16

ATLANTIC SURFCLAM — Housekeeping

What is being considered?

The department would like to make the rules for Atlantic surfclams consistent with federal waters. This requires:

- 1) Updating the name — surfclam is one word, not two; and
- 2) Requiring individuals to follow the federal rules.

Why is this change necessary?

Atlantic surfclams are harvested from federal waters and landed in Maryland. The rules should be consistent with federal waters. Instead of making a regulation change each time the federal rule changes, the new regulation will reference the federal code. Having clear consistent rules will make it easier for harvesters and enforcement.

Who will this affect?

Anyone who harvests Atlantic surfclams.

When will this be effective?

The department expects the changes to be effective by the spring of 2021; however, the exact date cannot be determined. The department will follow our normal scoping and proposal procedures.

Has this change been discussed with stakeholders?

No.

BLUEFIN TUNA, BILLFISH, SWORDFISH, AND SHARK — Recreational Reporting

What is being considered?

The department would like to make it easier for recreational anglers to comply with the catch card census program's reporting and tag requirements. The department is considering the following changes:

- 1) Allow a shark landed from shore to be moved from the point of landing to the nearest catch card census reporting station where a catch card must be returned and exchanged for a tag.
- 2) When a catch card census reporting station is closed, allow an angler to retain the receipt from the completed catch card instead of obtaining a tag.

Why is this change necessary?

The National Marine Fisheries Service requires all recreational anglers to report bluefin tuna, billfishes, and swordfish. Additionally, all landed sharks (except spiny dogfish) are required to be reported in Maryland. To fulfill this requirement, the National Marine Fisheries Service works with the department by providing technical support and funding to implement a catch card census program.

Anglers are required to complete a catch card when they return to port for each bluefin tuna, billfish, swordfish, or shark on board the vessel. The angler returns the catch card to a reporting station and a tag is provided for each completed catch card. The angler is required to place this tag around the tail of the fish before removing it from the vessel. Trailered boats cannot be pulled from the water until the tag is in place. Shore-based shark anglers must turn in the catch card and tag the shark prior to moving it from the point of landing.

Catch cards are available from the department's website, reporting stations, and kiosks. Tags can only be obtained by returning the completed catch card at an open reporting station.

When reporting stations are closed, anglers must use a self-serve kiosk. Anglers must complete the catch card and the attached receipt. The angler retains the receipt, which replaces the tag, and deposits the catch card into the locked box at the kiosk. This is inconsistent with the current regulatory requirement, but is necessary for reporting purposes. This information needs to be added to the regulation since it is not possible to obtain a tag after hours. Making the change in regulation will align the regulatory requirements with current practice.

The requirement for shore-based anglers to tag the shark prior to moving it from the point of landing creates many issues for anglers. The drive to the nearest reporting station or self-serve kiosk can be long and burdensome requiring all gear to be put away, airing up tires, finding someone to attend to their catch, and on busy park days, possibly not being allowed back on the beach until capacity allows. Allowing shore-based anglers to transport the shark to the nearest reporting station or self-serve kiosk will make it easier for anglers.

Who will this affect?

Recreational anglers who fish for bluefin tuna, billfishes, swordfish, or sharks.

When will this be effective?

The department expects the changes to be effective by the spring of 2021; however, the exact date cannot be determined. The department will follow our normal scoping and proposal procedures.

Has this change been discussed with stakeholders?

No. It will be discussed at the Recreational Coastal Forum in September.

FISHERY MANAGEMENT AREA — Cushwa Hatchery

What is being considered?

The department would like to designate Cushwa Hatchery as a Fishery Management Propagation Area.

Why is this change necessary?

All state hatcheries are designated as Fishery Management Propagation Areas. The property that contains Cushwa Hatchery was recently acquired by the department and will be managed by Fishing and Boating Services. The facility needs to attain the same designation as all other state-owned hatcheries.

Who will this affect?

This affects the general public. Public access to any Fishery Management Propagation Area is prohibited except with prior permission of the facility staff or as otherwise posted. The previous owners of the hatchery also limited access, so this action will not negatively affect anyone.

When will this be effective?

The department expects this change to be effective by December 2020, however the exact date cannot be determined. The department will follow our normal scoping and proposal procedures.

Has this change been discussed with stakeholders?

No

LIMITED FISHING GUIDE (TYPE L) — Housekeeping

What is being considered?

The department needs to update the regulation for a limited fishing guide (Type L) to incorporate the changes made during the 2020 legislative session.

Legislation changed the method of propulsion for a boat or vessel under the guidance of a limited fishing guide (Type L) from oars and paddles to human power. Currently, the regulation only allows the vessels to be propelled by oars or paddles. The regulation will be updated.

Why is this change necessary?

The change will make the regulation consistent with the statute.

Who will this affect?

This affects individuals licensed as a limited fishing guide and anyone who is guided by them.

When will this be effective?

The department expects this change to be effective by the spring of 2021, however the exact date cannot be determined. The department will follow our normal scoping and proposal procedures.

Has this change been discussed with stakeholders?

No, these are housekeeping changes based on legislation.

SHELLFISH (Oysters, Soft-Shell Clams, and Hard Clams) — NSSP Requirements

What is being considered?

The department is considering changes for the oyster and clam (soft-shell and hard) regulations that will ensure compliance with the National Shellfish Sanitation Program's Model Ordinance.

Overview

- Natural Resources Article, §4-1027, Annotated Code of Maryland, authorizes the department, in consultation with the Maryland Department of Health, to adopt regulations to carry out the requirements of the National Shellfish Sanitation Program (NSSP). Under federal law, the state is required to comply with the NSSP for shellfish harvest and sale in order to participate in interstate commerce of shellfish.
- These changes apply to oysters, hard clams, and soft-shell clams (*Mya arenaria* and genus *Tagelus*).
- It will look like we are making significant changes because we are reorganizing certain chapters and regulations for clarity. The statement of purpose will be very descriptive so that everyone knows what is changing.
- Housekeeping items will be completed as they are found.

Clams (Soft-Shell and Hard) — Recreational

- No changes, but the regulation will consolidate the rules to make them easy to understand.

All Wild Caught Shellfish — Recreational, Commercial, and Dealers

- You may not buy or offer to buy shellfish that were caught for recreational purposes.

All Wild Caught Shellfish — Dealers

- Must accept oysters, soft-shell clams, or hard clams only:
 - From a licensed harvester;
 - On the same day of harvest; and
 - If tagged as required by regulation.
- Must maintain and submit any records the Department may require.
- Must follow the National Shellfish Sanitation Program Model Ordinance

All Wild Caught Shellfish — Commercial

- Commercially harvested shellfish provided or used for human consumption must be harvested in accordance with the National Shellfish Sanitation Program Model Ordinance.
- Commercially harvested shellfish that will be provided or used for human consumption must be delivered to a certified dealer by a certain time on the same day of harvest (9 p.m. from October through April; 4 p.m. from May through September)
- Oysters and *Mya arenaria* must be sold at a buy station
- Razor clams must be sold to a dealer. You can sell your own razor clams if you have a dealer's license issued by the department in addition to your commercial license.

Hydraulic Clam Dredges — Commercial

- All rules for hydraulic clam dredges will be put into the same regulation instead of being spread out.
- The regulation about distance from shoreline near Sandy Point State Park in Anne Arundel County contradicts the distances in the statute. The minimum distance from shore from January 1 through March 31 should be 800 feet, not 150 feet. The correction will be made in the regulation.

Tolerance for *Mya Arenaria* — Commercial

- Commercial licensees may not possess more than 40 soft-shell clams of the species *Mya arenaria* per container that measure less than 2 inches along the longest dimension of the shell.
- Currently, the regulation allows for 5 percent to be under size. Assigning a number will make it clear for harvesters and enforcement.

Container Requirements — Commercial

- All clams must be stored in a container prior to leaving the growing area.
- *Mya arenaria*
 - Must be stored in the rectangular shaped container currently described in regulation, the bushel basket would no longer be an option.
 - Must remain in the original container until a tag is no longer required on the container.
- Razor clams (genus *Tagelus*) must be stored in a container of any size or dimension.
- Hard clams must be stored in a container of any size or dimension.

Tag Requirements — Commercial

- A tag will be required for all hard clams and *Mya arenaria*.
- You can get tags from the department for a moderate fee or you can use your own tags if you are a certified dealer by the Maryland Department of Health and the tag has the appropriate information.
- You will only be able to have one type of tag, either wild shellfish or farm-raised shellfish, with you while harvesting.

Razor Clams — Commercial

- The department is considering prohibiting the commercial harvest of razor clams for human consumption.
- Razor clams would only be able to be harvested commercially for bait. They will be exempt from the safe handling requirements necessary for human consumption.
- The department is requesting feedback to see if it would be necessary to create a permit to allow harvesters to sell razor clams for human consumption. It is the department's understanding that the razor clam fishery in Maryland is a bait fishery. If a food industry is present in Maryland, the department could create a process that would include the same safe handling requirements as *Mya arenaria*. Part of that process would prohibit having bait and food clams on board at the same time.

Why is this change necessary?

These changes are necessary to ensure a safe product for consumers.

Who will this affect?

This affects recreational harvesters, commercial harvesters and dealers. Anyone who harvests or deals in hard clams, soft-shell clams (*Mya* and *Tagelus*), or oysters.

When will this be effective?

The department expects this change to be effective in the spring of 2021, however the exact date cannot be determined. The department will follow our normal scoping and proposal procedures.

Has this change be discussed with stakeholders?

Parts of this have been scoped in the past, but the department feels that the details have been developed enough that it should be scoped again.

STRIPED BASS — Chesapeake Bay Commercial Transfer Cap

What is being considered?

The department is considering removing the cap on the amount of striped bass shares that can be permanently transferred within a single year by a permittee registered in a Chesapeake Bay commercial striped bass fishery. Removing the annual transfer cap would allow a permit holder to sell or buy up to that maximum amount in one transaction, rather than having to break it up in multiple transactions over multiple years.

The cap on how much of the total fishery can be owned still exists so that no one person can own more than 1% of the Chesapeake Bay fishery.

Definitions

"Allocation" is defined in regulation (COMAR 08.02.15.02) as pounds or numbers of striped bass which a striped bass permittee is provided on an annual basis.

"Commercial tidal fish licensee" is defined in regulation (COMAR 08.02.15.02) as a person licensed by the Department to catch and sell finfish.

"Individual Transferrable Quota" is defined in regulation (COMAR 08.02.15.02) as the fishery in the Chesapeake Bay and its tidal tributaries that provides exclusive privileges to an individual by assigning a fixed share of the commercial striped bass quota to each individual registered with a striped bass permit.

"Share" is defined in regulation (COMAR 08.02.15.02) as a percentage of the quota that is assigned to a specific striped bass permittee.

"Striped bass permit" is defined in regulation (COMAR 08.02.15.02) as a permit issued by the Department which allows a person the privilege to commercially harvest striped bass.

Why is this change necessary?

The purpose of the transfer cap implemented in 2015 was to slow down any perceived fishery consolidation. The department and the industry have both found this cap to be restrictive and unnecessarily burdensome. Removing the cap will allow business flexibility and reduce the burden of paperwork the industry and the department must complete. The cap on possession of more than 1% of the fishery is not changing and this should be enough to prevent fishery consolidation.

Who will this affect?

This action applies to all commercial striped bass permittees in a Chesapeake Bay commercial striped bass fishery.

When will this be effective?

The department expects this change to be effective in the spring of 2021, however the exact date cannot be determined. The department will follow our normal scoping and proposal procedures.

Has this change been discussed with stakeholders?

These changes were requested and discussed with the striped bass industry workgroup on June 17, 2020. This request reflects the recommendation of the workgroup.

STRIPED BASS — Circle Hooks

What is being considered?

The department needs to require the use of non-offset circle hooks when fishing for striped bass with bait.

- 1) Atlantic Ocean, Its Coastal Bays and Their Tributaries — The department needs to implement a requirement to use circle hooks in the Atlantic Ocean, its coastal bays and their tidal tributaries while recreationally fishing for striped bass using bait.
 - If you are targeting striped bass and using bait, you must use a non-offset circle hook.
 - This is a new requirement and would be in effect year round.
- 2) Chesapeake Bay and Its Tidal Tributaries — The department has already implemented circle hook requirements for the Chesapeake Bay and its tidal tributaries, however the language of that regulation may need to be modified to include all bait fishing for striped bass. Currently, the rules have specific conditions and only apply during certain times of the year. Potential change:
 - You must use a non-offset circle hook if you are:
 - Live-lining;
 - Chumming; or
 - Using bait while targeting striped bass
 - The new rule would be in effect year round.

Definitions

“Chumming” is defined at COMAR 08.02.25.01B(5) as: placing fish, parts of fish, or other natural or manmade attractants upon which fish might feed, in the water, not attached to a hook, for the purpose of attracting fish to a particular area so that they might be caught. Chumming includes chunking.

“Circle hook” is defined at COMAR 08.02.25.01B(6) as: a non-offset hook with the point turned perpendicularly back to the shank.

“Live-lining” is defined at COMAR 08.02.25.01B(27) as: using a live finfish on a hook for the purpose of catching other fish with:

- (a) Hook and line;
- (b) Rod and reel; or
- (c) Handlines.

Why is this change necessary?

Addendum VI to Amendment 6 to the Atlantic Striped Bass Interstate Fishery Management Plan requires the mandatory use of non-offset circle hooks when fishing for striped bass with bait. The requirement is for all striped bass recreational fisheries and must be implemented by January 1, 2021. The department must implement this requirement to be in compliance with the Atlantic States Marine Fisheries Commission (ASMFC) Atlantic Striped Bass Fishery Management Plan. The intent of the requirement is to improve post release survival of striped bass and reduce discard mortality. Discard mortality accounts for a considerable amount of removals in the Atlantic striped bass fishery along the east coast. The latest assessment assumes 9% of fish that

are released alive die as a result of being caught, although there is some evidence it may be higher, particularly in the summer months.

The use of circle hooks by anglers targeting striped bass with bait, live or chunk, has been identified as a method to reduce the discard mortality of striped bass in recreational fisheries. The configuration of the hook makes it less likely to fatally hook or “deep hook” a fish when using bait compared with the standard “J” hook. When a circle hook begins to exit the mouth of a fish, the shape causes the shaft to rotate towards the point of resistance and the barb is more likely to embed in the jaw or corner of the fish’s mouth and it is less likely to puncture internal organs if the hook is swallowed.

The department will continue its public education and outreach campaign on the benefits of circle hooks when fishing with bait.

Who will this affect?

Recreational anglers and anglers on charter boats who fish for striped bass in the tidal waters of Maryland.

When will this be effective?

The department expects this change to be effective by January 1, 2021, however the exact date cannot be determined. The department will follow our normal scoping and proposal procedures.

Has this change been discussed with stakeholders?

This circle hook requirement has been discussed with stakeholders throughout the state as part of our work with ASMFC on Addendum VI. In addition, it was presented at the Fall 2019 Coastal Fisheries Forum as well as various Sport Fisheries Advisory Commission meetings in 2019 and 2020. Anglers have also heard about the requirement from the public education and outreach campaign on the benefits of circle hooks when fishing with bait.

STRIPED BASS — Commercial ITQ Hook & Line Season Extensions

What is being considered?

The department is considering the following for the commercial striped bass Chesapeake Bay Individual Transferable Quota (ITQ) hook and line fishery:

- 1) Remove the prohibition for fishing on Friday. Currently, permittees are prohibited from fishing with hook and line on Friday, Saturday, and Sunday.
- 2) Extend the fishing hours to one hour after sunset. Currently, permittees must quit fishing by sunset.

Why is this change necessary?

Changes for the ITQ fishery were scoped from June 15 through June 30, 2020. The striped bass industry workgroup requested that additional changes be made for the hook and line fishery.

No additional harvest will be permitted. These changes do not increase a permittee's harvest, they allow permittees to have additional choices for harvest. These changes are necessary to give commercial striped bass permit holders in the ITQ fishery greater business flexibility, allow them to time their fishing activity to meet market demands, and allow them greater ability to plan their business activities. With declines in markets during the ongoing global pandemic, business flexibility is of utmost importance.

These changes are consistent with the Chesapeake Bay ITQ fishery priorities by providing greater business flexibility without increasing harvest.

Who will this affect?

This action applies to all commercial striped bass permittees in the Chesapeake Bay Individual Transferrable Quota fishery.

When will this be effective?

The department expects this change to be effective in December 2020, however the exact date cannot be determined at this time. The department will follow our normal scoping and proposal procedures.

Has this change been discussed with stakeholders?

These changes were requested and discussed with the striped bass industry work group on June 17, 2020. These requests reflect the recommendations of the workgroup.

SUBMERGED AQUATIC VEGETATION — Housekeeping

What is being considered?

The department needs to make corrections in certain submerged aquatic vegetation protection zones. Amendments to the zones became effective June 2020. Maps of the areas are being created so that you can have a visual description of each area rather than just the coordinates. During the mapping process, errors or points needing clarification were found within the text. The issues are noted below, but others will be included if discovered during the mapping process.

1) Talbot County — Miles River and Porter Creek — [COMAR 08.02.01.12](#)

Section B(3)(e) — The coordinate that is bolded and underlined below should be Lat. 38°48.868' N not Lat. 38°14.868' N.

All of the waters of Miles River and Porter Creek enclosed by a line beginning at a point on the western shore of Hambleton Point defined by Lat. 38°49.215' N, Long. 76°14.103' W;then running approximately 263° True to a point defined by Lat. 38°48.893' N, Long. 76°14.435' W; then running approximately 174° True to a point at or near the shore defined by **Lat. 38°14.868' N**, Long. 76°14.431' W; then running northeasterly along the shore to the point of beginning.

2) Talbot County — Miles River, Tilghman Creek, and Porter Creek — [COMAR 08.02.01.12](#)

Section B(3)(f).

a) The first coordinate bolded and underlined below should be Lat. 38°49.244' N not Lat. 39°49.244' N.

b) The second set of coordinates that are bolded and underlined below are duplicative and will be removed.

All of the waters of Miles River, Tilghman Creek, and Porter Creek enclosed by a line beginning at a point defined by Lat. 38°49.056' N, Long. 76°14.734' W; then running approximately 141° True to a point defined by Lat. 38°49.011' N, Long. 76°14.684' W; then running approximately 64° True to a point defined by Lat. 38°49.070' N, Long. 76°14.533' W; then running approximately 351° True to a point defined by Lat. 38°49.164' N, Long. 76°14.553' W; then running approximately 333° True to a point defined by **Lat. 39°49.244' N**, Long. 76°14.606' W; then running approximately 56° True to a point defined by Lat. 38°49.298' N, Long. 76°14.506' W; then running approximately 12° True to a point defined by Lat. 38°49.371' N, Long. 76°14.486' W; then running approximately 318° True to a point defined by Lat. 38°49.416' N, Long. 76°14.538' W; then running approximately 266° True to a point defined by Lat. 38°49.408' N, Long. 76°14.676' W; then running **approximately 313° True to a point defined by Lat. 38°49.620' N, Long. 76°14.970' W; then running approximately 58° True to a point defined by Lat. 38°49.620' N, Long. 76°14.970' W; then running approximately 329° True** to a point defined by Lat. 38°49.779' N, Long. 76°14.962' W;then running southeasterly along the shore to the point of beginning.

3) Talbot County — Harbor Cove and Eastern Bay — [COMAR 08.02.01.12](#)

Section B(3)(n) — The coordinates bolded and underlined below are missing labels. One is missing “Lat.” and the other is missing “W”.

All of the waters of Harbor Cove and Eastern Bay enclosed by a line beginning at or near a point on the shore of Lowes Point defined by Lat. 38°46.271' N, Long. 76°20.294' W; then running approximately 352° True to a point **defined by 38°46.708' N**, Long. 76°20.986' W; then running approximately 38° True to a point defined by Lat. 38°47.378' N, **Long. 76°19.314'**; then....to the point of beginning.

Why is this change necessary?

The changes are necessary to make the regulation clear for all users.

Who will this affect?

Commercial clammers who utilize any of the affected areas.

When will this be effective?

The department expects this change to be effective in late fall of 2020, however the exact date cannot be determined. The department will follow our normal scoping and proposal procedures.

Has this change be discussed with stakeholders?

No. These are housekeeping changes.

Striped Bass Industry Workgroup Meeting Draft Agenda
Online Meeting, Google Hangout
June 17, 2020, 5:00 - 7:00pm

5:00– 5:10 Welcome / Announcements

- Introductions
- Reminder on Ground Rules, Operating Procedures, Open Meetings Act with accommodations for Google hangouts
- Reminder that no voting is taking place tonight; information and some feedback only

5:10 – 5:45 Discussion on Proposed Transfer Changes

- Quota Transfer Caps
 - 3,000 lb a year permanent transfer cap removal
- New Permit Transfer Process
 - New License transfers with striped bass permits attached process
 - Temporary and Permanent in-season transfer process
 - Pre-season permit transfer process

Action Items: The department will issue a public notice adjusting the transfer increments; the department will be scoping a regulation change removing the transfer cap; will continue to consider changes to permit transfers.

5:45 – 5:55 Declaration Updates

- Proposed declaration process due to COVID-19 shut downs

Action Items: Declaration is July 15th – September 15th. Please remember to make an appointment now in order to ensure you declare within the declaration window.

5:55 – 6:05 Overharvest Discussion

- Data indicate an overharvest for the 2019 season
 - ASMFC regulation requirements

Action Items: Overage will come out of 2020 common pool quota and openings will be adjusted accordingly.

6:05 – 6:15 Regulatory Updates

- Season extension regulations coming
- Update on transfers while a license is temporarily leased out

Action Item: The department will add two items to the ITQ season extension scoping: 1) Friday openings and 2) extending to one hour past sunset. Regulations currently allow for fishing one hour before sunrise until sunset in the ITQ fishery.
